

Global Technology

Join our McFamily

We're hungry. Yes, we may be best known for our World Famous Fries® and our brand routinely cracks the Top 10 lists like best brand in the world and #1 food and drink app. But, we're not walking away from the table satisfied with that. **In fact, we are hungry to be known for our fries, AND the side of tech that goes with it.**

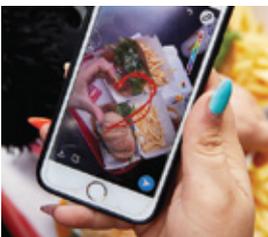

We're in the midst of a **tech revolution** in our business, doubling down on tech and creating a **tech 'recipe' that is almost as proprietary as our Big Mac sauce®.** Our tech organization is made up of intrapreneurs who get to **build really cool tech with scary smart people** using the latest innovations like AI, IOT, edge computing. And we do it working along **diverse, global teams** who are always hungry for a challenge. It's bonus points when you get to see your family and friends use the **tech you build** in whatever neighborhood they call home to their favorite McDonald's restaurant.

We have a **menu of tech challenges** to choose from and the **resources and people to do it.** All we ask is that our people **live by our three golden rules. Focus on the customer,** use our **scale for exponential impact** and do it with **speed.** Because we're hungry, and we don't want to wait.

For those who do that, **your career will shine as bright as our Golden Arches.**

Why Global Technology?

Exciting work

Work on industrial-scale **products and platforms** that **delight people** and be at the intersection of **food and tech**

Join one of the **most innovative companies** in the industry, which is **committed to growing its technology footprint**

Be part of company investing **heavily in tech across every area of the business** (Systemwide \$1 billion+ annually)

 Opportunity to work on **cutting edge technology**

 Continuous innovation around **AI, ML Image/Voice Recognition, IOT, robotics, edge computing**

 Exciting plans for technology in the future

Great Employer

A **leading and trusted company** that's a household name across the world (#9 Brand in World according to Interbrand 2019 report)

Drive exponential impact at a **incredible global scale** at one of the largest companies in the world (present in over 100 countries, one of the largest employers in the world, technology touches 69M customers a day)

Competitive compensation for top performing tech talent & robust benefits (education assistance, sabbatical, summer Fridays)

A **values driven and people first organization** that focuses on employee development, sustainability and the environment

Personal Growth

Be there from the start and **build the team from the ground up**

Work with and learn from **diverse, global teams solving complex problems** at scale

Benefit from a **wide breadth of topics**, from **technology in the restaurants** to customer facing digital engagement

Open **career architecture** allowing people to reskill and upskill

Learning based on technical challenges, strong mentorship and access to conferences, hackathons, meetups and employee tuition assistance **recently concluded a Burger Hack and Internship Program**

Energizing culture

Cross-functional teams that fully embrace **Agile** ways of working

A team that **embraces failure as a way to learn and get better** faster in a safe environment, and makes decisions quickly and collaboratively

A culture of **'build it here'** based on our customers' needs limited use of commercial off-the-shelf software

A culture focused on **diversity, equity and inclusion** with many recent commitments and strides forward in the area
